Skills

HTML, CSS, Java, JavaScript, jQuery, SQL, BootStrap, Ruby, Ruby on Rails, Swift, Sass, Git, Excel, AWS, PHP, Spring MVC, MySQL, RESTful applications

Experience

Freelance Web Developer // dylandogdev.com   2017 - Present

Full stack web developer specializing in Java. Experience with all aspects of the development lifecycle from planning to maintenance.

Student // The Software Guild   2018

Over 750 hours of hands-on coding under instructors with 15+ years of experience. I created many full stack Java applications in an Agile environment with daily standup meetings.

Order Specialist // University of Washington   2016 - 2017

Developed collections for one of the largest library systems in the country. I specialized in digital media acquisition and licensing. I also worked with databases such as Hathi Trust, and handled large volume FTP ordering and mapping into our ILS, Alma.

Owner // Blind Friar Books   2012 - 2016

Used the skills I picked up at Whiskers to spinoff my own startup. This was my passion project in college and helped me pay for my education. I achieved the goal of disrupting the traditional bookselling space by proving that I could create a successful online sales presence without the burden of maintaining my own traditional website.

Senior Asst. Manager// Whiskers Books   2010 - 2016

Started as a cashier and moved up to handling inventory software and training other employees on all new software. When Whiskers went 100% online I stayed with them and handled online customer service escalations, shipping and inventory management.

Internships

Intern // Historic Seattle   2012

Performed digital archival and database research as part of the nonprofit grant writing process. Highlights included creating a roster of all the historical tenants of a building with no original tenant records to help me.

One of the main projects I worked on (Pike and Pine/Bauhaus Buildings) was featured in local and national news (links on my website).

SUYI Volunteer // Seattle Public Schools   2013

Volunteered as a student assistant teaching math and science to Kindergarten & 1st grade students at Bailey Gatzert Elementary.

Education

BA (Summa Cum Laude): History // Seattle University

Full Stack Java Certification // The Software Guild

University of Washington Professional Development Courses:

- "Fundamentals of Project Management"

- "Communication and Design"

- "Writing Effective Policies and Procedures"
